

- 2 Brad works in a forest preserve. One of his responsibilities is to provide visitors with maps of the camping area. The diagram shows his map of the camping area depicted on a grid.

Brad decides it would greatly benefit the visitors if the map were a little larger. If he enlarges the map of the camping area using the same layout guides shown in the diagram, which ordered pair would best represent a point on the perimeter of the camping area on the enlarged map?

- A (0, 9)
- B (1, 2)
- C (1, 10)
- D (11, 1)

- 3 A line segment has its endpoints at $(5, 4)$ and $(-4, -5)$ on a coordinate grid.

If the line segment is translated 7 units to the left and 4 units down, what will be the coordinates of the new endpoints?

- A $(-2, 0)$ and $(3, -1)$
- B $(2, 4)$ and $(-7, -5)$
- C $(-2, 0)$ and $(-11, -9)$
- D $(3, -1)$ and $(12, 8)$
